APPLICATION SERIAL NUMBER

10/764,138

DOES NOT COMPLY WITH THE SEQUENCE RULES.

- The claims are drawn to genes of ASK group II. ASK group II consists of three genes : ASK dzeta, ASK etha, and ASK iota. The sequences for these genes were incorporated by reference to journal articles that listed GenBank accession numbers for each gene. Sequences associated with GenBank accession numbers can be altered through updating/editing, therefore each of these genes must be assigned a SEQ ID NO, and a sequence for each of the genes must be submitted. To avoid the introduction of new matter, the applicant must ensure that the sequences submitted are the sequences that were publicly available through GenBank at the time of filing.
